Lead Software Engineer — Nagarro, Gurugram, India Dec 2010 – Jan 2015
Software Engineer — Acidaes Solutions Pvt. Ltd., Noida, India Aug 2009 – Dec 2010

PROJECTS

Finance & Real Estate — US Railroad Transportation Company Jul 2025 – Present
Angular 15, Java 17, Microservices, Spring Boot/Batch, Web API, Oracle, Jenkins, Git

- Lead a cross-functional team delivering Finance and Real Estate modules, owning Jira task assignment and on-time user-story delivery.
- Architected frontend and backend performance improvements, resolving bottlenecks and optimizing stored procedures to reduce latency and raise throughput.

Price Selection & Maintenance — US Railroad Transportation Company Aug 2024 – Jun 2025
Angular 15, Java 17, Microservices, Spring Boot/Batch, MongoDB, Jenkins, Datadog, JUnit, Jasmine, Karma, Postman, Swagger

- Refactored and optimized APIs that previously ran for hours, cutting response time to 7–10 minutes.
- Drove proactive monitoring and root-cause analysis with Datadog (memory leaks, long-running MongoDB queries); led code reviews and Jenkins build/deployment pipelines.

Intermodal Asset Tracking — US Railroad Transportation Company Jun 2023 – Jul 2024
Angular 15, NgRx, React, Redux, MapBox, PrimeNG 15, Java 11, Spring Boot/JPA/Batch, Kafka, MQTT, ClickHouse, MongoDB, OpenShift, Jenkins

- Architected migration to Angular 15 / PrimeNG 15 using micro-frontend design; integrated MapBox to render real-time asset and driver locations on terminal maps.
- Built Java microservices consuming Kafka-streamed coordinates and a React admin module; served as Team Lead across sprint planning and delivery.

Contract Manager — US Sustainable Resource Management Company Nov 2017 – Apr 2023
Java 8, Web API, KnockoutJS, JavaScript, jQuery, MS SQL, ETL, JPDL Workflow, Azure DevOps

- Re-architected a JSP legacy system into a responsive Web API + KnockoutJS application with real-time task and contract notifications.
- Optimized SSRS reports and ETLs, reducing report generation from 16 hours to 10 minutes; built CI/CD pipelines on Azure DevOps.

Mobile Rail Tool — US Railroad Transportation Company Dec 2015 – Apr 2017
Java, REST API, AngularJS, jQuery, OOJS, Oracle, IBM Mainframe

- Delivered an online/offline mobile browser application that replaced conductor paperwork for rail-car work orders; led POCs, design, development, and offshore coordination.

Financial Planning Application (Grades 7–12) — US financial-literacy organization | ASP.NET MVC, jQuery, Backbone.js, HTML5, CSS3, MS SQL | Sep 2013 – May 2014. Architected the single-page simulation and CMS; defined JavaScript coding standards and owned technical delivery.

Knowledge Navigator — German luxury automotive manufacturer | .NET C#, XAML, Leap Motion SDK, Microsoft Surface SDK, MS SQL | Feb 2012 – Aug 2013. Built a 3D knowledge-graph system with voice and gesture input (Leap Motion, Microsoft Surface); led POCs and mentored the team.
